Project Planning Phase

Import Data using Transform Maps (Spreadsheet)

• Prepare the sample spreadsheet and download it as Sample Spreadsheet.xlsx.

• Create and configure the Employee Test table.

• Create the Employee Import Import Set table.

• Create and configure the Sample Spreadsheet Import Transform Map.

• Run the transformation and validate imported records.

• Enable Coalesce and test repeated or changed employee data.

• Create the three required reports.

• Create the Employee Analytics Dashboard and add the reports.
