Project Testing

Import Data using Transform Maps (Spreadsheet)

• Verify that the spreadsheet loads successfully into the Import Set table.

• Verify that source and target fields are mapped correctly.

• Run the Transform and confirm successful completion.

• Open Employee Test and verify the imported employee records.

• Test Coalesce by changing existing employee data and adding new employee IDs.

• Verify that changed existing IDs are updated and new IDs are inserted.

• Repeat the same import and verify that unchanged duplicate rows are ignored.

• Verify that all three reports execute successfully.

• Verify that all reports appear on the Employee Analytics Dashboard.
