Project Demonstration

Import Data using Transform Maps (Spreadsheet)

• Demonstrate the sample spreadsheet and employee data.

• Show the Employee Test custom table and its fields.

• Show the Employee Import staging table.

• Open Sample Spreadsheet Import and demonstrate source/target tables and field mappings.

• Run the Transform and show the success result.

• Open Employee Test and demonstrate imported records.

• Demonstrate Coalesce using changed and new employee data.

• Show Transform History with inserted, updated, and ignored records.

• Open and demonstrate the three reports.

• Open Employee Analytics Dashboard and demonstrate the consolidated reports.

• Final result: employee data is successfully imported and managed in ServiceNow with duplicate control and visual reporting.
